PROFESSIONAL SUMMARY

Computer Science and Data Science graduate with hands-on experience in backend development, Python automation, internal dashboard development, and Linux-based robotics systems. Proficient in Java, Spring Boot, Python, SQL, REST APIs, PostgreSQL, Docker, and Git, with strong fundamentals in Data Structures, OOP, DBMS, Operating Systems, and Computer Networks. Interested in building reliable backend applications and solving real-world engineering problems.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, C
Backend: Spring Boot, FastAPI, Node.js, REST APIs, JWT, RBAC
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM
Tools: Git, GitHub, Docker, Linux, Postman, VS Code
Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks,

PROFESSIONAL EXPERIENCE

Addverb Technologies

May 2026 – Present

Advanced Robotics Intern

Noida, India

- Developed an internal Python-based reporting dashboard for ALOHA, Static, and Dynamoid robotics stations to visualize episode statistics, operator activity, shift-wise reports, downtime, and operational metrics.
- Automated shift-wise and date-wise operational reporting, reducing dependency on manually maintained Excel sheets and improving visibility into robotics data-collection operations.
- Collaborated with robotics and engineering teams to troubleshoot Linux systems, SSH connectivity, networking, robot communication, recording services, and data-collection workflows in a production environment.
- Created technical documentation and standard operating procedures for robotics setup, reporting workflows, troubleshooting, and shift handovers to improve operational consistency.

PROJECTS

Centralized Robotics Operations Platform

FastAPI, React.js, PostgreSQL, Docker

- Designed and developed a centralized platform for managing robotics operations, including operator authentication, robot allocation, shift management, data-collection sessions, and incident reporting.
- Built REST APIs using FastAPI and implemented RBAC, PostgreSQL data models, audit logging, robot locking, and Docker-based deployment workflows.

Campus Issue Tracker System

Java, Spring Boot, React.js, MySQL

- Developed a full-stack issue management system enabling students and administrators to report, assign, track, and resolve campus issues.
- Built secure REST APIs using Spring Boot with JWT authentication, role-based access control, and MySQL database integration.

Fact Check Agent

Python, Streamlit, OpenAI API

- Built an AI-powered application for document-based claim verification with automated report generation.

EDUCATION

GL Bajaj Institute of Technology and Management

2022 – 2026

B.Tech in Computer Science and Data Science

CGPA: 7.95/10

First Division with Distinction

Bihar School Examination Board

2022

Class XII

75.8%

CERTIFICATIONS & ACHIEVEMENTS

- IBM SkillsBuild Artificial Intelligence Certificate – Grade A+ Deloitte Australia Data Analytics Job Simulation
- Cisco CCNA: Switching, Routing, and Wireless Essentials Solved 200+ DSA problems using Java
